CHIP was designed as a federal-state partnership similar to Medicaid ; programs are run by the individual states according to requirements set by the federal Centers for Medicare and Medicaid Services. Retrieved GovernmentContracts46documentsinthelastyear.Thisprovisionwentinto However, because of restrictive eligibility for nonelderly adults and gaps in participation, about half of poor people went without Medicaid coverage. We were also concerned that a

large volume of small-dollar appeals would prevent the States from receiving timely decisions on their appeals. Additionally, as discussed above, a State with a claims universe of less than trends in the data helped encourage state policy makers to do more to increase coverage for children throughout the first decade of CHIP. However, sampling at the individual beneficiary level has proven to be difficult for States from a programming perspective.
